

## PL 760

# Plug and equipotential plate for surgical unit

### GENERAL INFORMATION

The **plug and equipotential plate** is part of the electrical installation of a safe medical area.

The **PL 760 model includes 4 electrical sockets with lids**, in a spike shaped position, which allows an efficient and safe connection to the electromedical equipment of this type of areas. It also includes, on the bottom, 4 equipotential sockets.

The front is made of 1.5mm thick stainless steel, frosted, with the edges bent at 90° without welding.
