

**30 years
offering
electrical
safety
solutions for
hospital
facilities**

We design and manufacture high quality technological products, for IT electrical systems of critical units, offering a wide range of advisory and maintenance services, in the environment of surgical areas and intensive care units.

The logo for EIKHO Hospital Engineering. The word "EIKHO" is in large, bold, white capital letters. The letters are set against a background of a hospital interior, with a blue and green color scheme. The letter "O" is a solid white circle. Below "EIKHO" is the text "HOSPITAL ENGINEERING" in a smaller, white, sans-serif font.

Electrical Infrastructure Solutions for Critical Areas of Hospitals

etkho.com

The equipment sold by ETKHO is CE marked, as Class I electrical device, having been electrically tested and certified in the DEKRA Testing Certification S.A.U.

We specialize in the **manufacture of electrical safety equipment and services** for critical areas of hospitals.

We offer high quality technological products and services, for IT electrical systems of critical units, with the objective of preserving patient safety, facilitating the management and analysis of the electrical installation to the hospital engineering team, both local and remotely.

ES 1000 Insulation Monitor

The medical **insulation monitor** continuously oversees the insulation resistance of IT medical systems

ETK UPS UPS Panel

The **UPS panel** ensures continuous power supply, avoiding cuts in the main network, for at least 2 hours

PL 6TT / 6TT-RX / 6TT-RJ Electrical outlet hospital panels

Electrical outlets and equipotential bonding rods are essential for surgical units, ICUs and critical care areas

ETK ES IT Power Supply Systems

The electrical safety insulation panel provides an **insulated power supply system** for critical areas of hospitals

ETK EES / EBB Ground Connections

Grounding sockets and connectors are essential in creating an equipotential ground connection, helping to avoid contact voltages in critical medical areas

ETK EPU Power Supply Unit for Surgical Lamps

Emergency power supply ensures that the lamp and its external wall controls remain operative for at least two hours

MRP 249-2 Insulation Monitor Multi Repeater

The purpose of the **insulation monitor multi repeater**, is to monitor the information of the insulation monitors connected to the network

TDS 149-2 Alarm Repeater

The purpose of the **alarm repeater** is to repeat the alarms detected in the insulation monitor, for the clinical staff of the medical location
